ENGLISH AND CHINESE DIOTIONARY. PUNTI AND MANDARIN PRONUNCIATION An Angly-Chinese Dictionary, by the Rev. W. LOBSCHEID, published at the Daily Press Office, Hongkong.

MOR scope and practical survice this Work stands unrivalled. All the new words which the Chinese have of late years been compelled to coin to express the numerous objects n muchinery, photography, telegraphy, and in science generally, which the rapid advance of foreign relations has imposed apon them, are here given in extense. Each and every word is fully illustrated and explained, forming exercises for students of a most instructive nature. Both the Court and Punti provin contions are given, the accents being carofully marked on the best principle hitherto attained, -. The typography displays the success of an attempt to inake the Obinese and English type correspond in the size of body, thereby effecting a vast comony of space, achieving a observess not previously attained, and dispensing with those; 1 T HOHNHOLZ & TALLEE offer for Sall vast margins and varunt spaces which have at very low prices a few Westmalian heretofore characterized Chinese publications: -Hams, Datch Cheese, Datch Harrings, Butter, The scape of the work is so great, and its understands English to communicate effective to with natives who understand nothing but Chinese. In this respect the work will be found indispensable to all Encopeans residing in China, and to the natices themselves it explains aubjects fully, with which very few mget of them are perfectly acquainted. To . parties resident in Haghand and laterested in China is earnot but be mealiable occasionally. It comprises upwards of two thousand, large
